LABORATORY & CLINICAL SOLUTIONS

IMPLANT PARTS | ATTACHMENTS | DIGITAL DENTISTRY

Two generations and over 40 years of service.

Founded in 1980, Preat Corporation has grown from a family-owned business into a trusted leader in dental attachments, implant components and prosthetic solutions.

Known for innovation and expert support, Preat pioneered attachment systems that enhanced function, esthetics and patient comfort. Over the years, the company expanded into custom abutments and implant parts, partnering with leading manufacturers. In 2020, Preat joined Young Innovations, further strengthening its ability to deliver innovative solutions and outstanding customer service.

his son, Chris Bormes, who served
as President from 2011-2020.

The Preat Promise

Clinical Choice

With a full portfolio of restorative options for single-tooth to full arch cases, we give you the freedom to choose the best solution for each patient.

Expert Support

Our restorative experts are here to help you identify implants, review your restorative options and even answer questions years after the restoration was placed – that's what we call lifecycle support and it's what we do every day.

Easy Ordering

We'll help you find the right item to fit your restorative plan. Our broad portfolio also means we can be your one-stop shop for implant restorations to make ordering even easier!

Lab Trusted

Over the decades, we've earned the trust of dental laboratories. We're here to be a true part of your implant restorative team.

Quality Tested

We know quality is essential. Preat products are tested to the highest standards and meet or exceed the fit of OEM providers.

Timely Delivery

99.4% on-time and accurate delivery means you and your patient receive exactly what you need when you need it. That's why we do what we do.

HADER BARS

The Hader Bar is the most popular and versatile bar attachment in the world as it is low profile, provides secure retention options, and is simple to service!

BAR PATTERNS

- » Available in standard and short heights
- » Plastic-wax is ideal for fast set investment

COMBO KIT

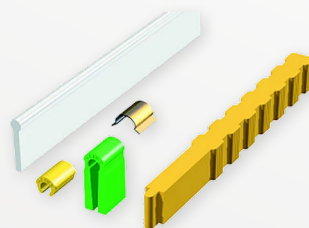

Everything needed for one bar case

- » 1 Plastic Bar Pattern
- » 2 Female Riders
- » 2 Metal Housings (either style)
- » 2 Processing Spacers

ALUMINUM ANALOG BAR

- » For relines, repairs, and making new prostheses

HADER BAR SERVICING KIT

Ideal for relines, rebases, repairs, or fabricating a new overdenture on existing bars or CAD-CAM bars

- » 1 Delrin Analog Bar
- » 2 Female Riders
- » 2 Metal Housings (either style)
- » 2 Processing Spacers

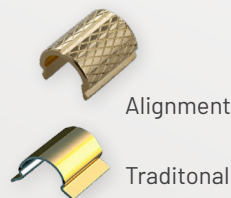

HADER BAR MANDREL

- » To assure parallelism between multiple bar segments

PROCESSING SPACER

- » The processing spacer will prevent the over extension of acrylic which inhibits flexation of the female ride

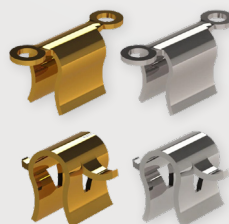

HOUSINGS

Easy and accurate alignment of riders and housings with space saving options.

FEMALE RIDERS

Retentions of female riders

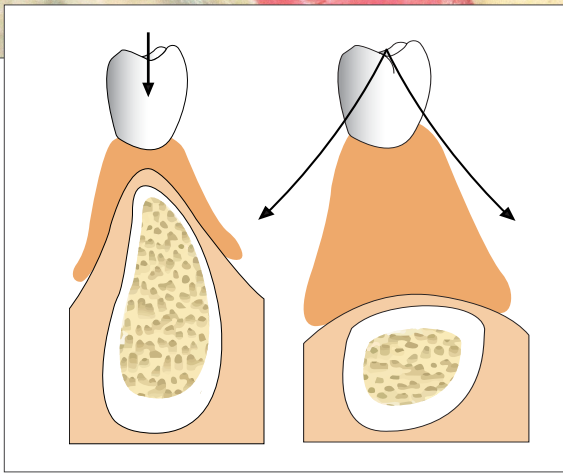

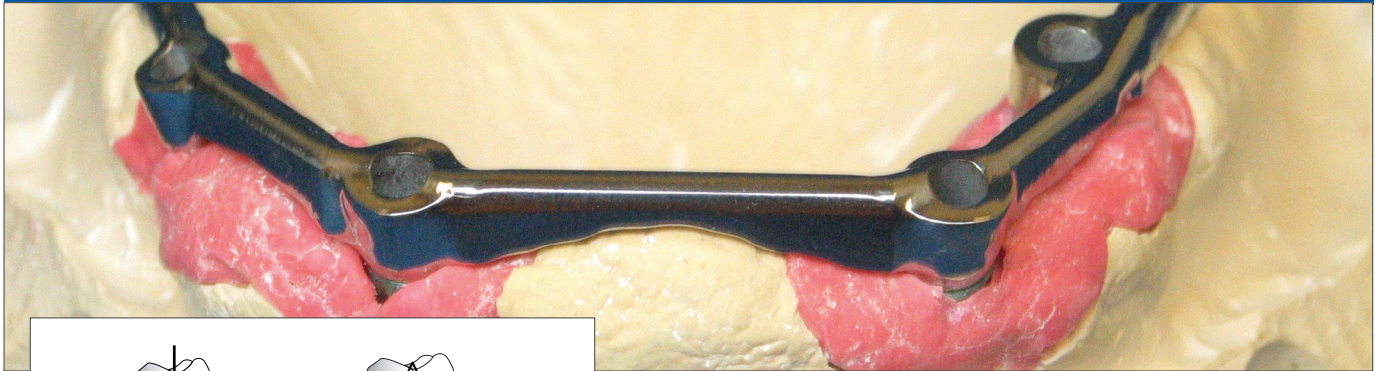

- » **Yellow**-standard
- » **White**-decreased
- » **Red**-increased
- » **Blue**-for worn bars

METAL CLIPS

Ackermann gold and stainless and C118 gold and stainless

Why Hader Bars are the Best Option for Bar Overdentures

INDICATIONS

- » In the maxillae, the bone quality and quantity often dictates the use of a bar to protect the implants in weaker bone via splinting.
- » In the resorbed mandible, the atrophied ridge can not be engaged by the denture flange and therefore does not provide prosthesis stability.
- » Extremely divergent implants are easier to accommodate with a bar overdenture.

ADVANTAGES OF THE HADER BAR

Flexibility in Prostheses Function

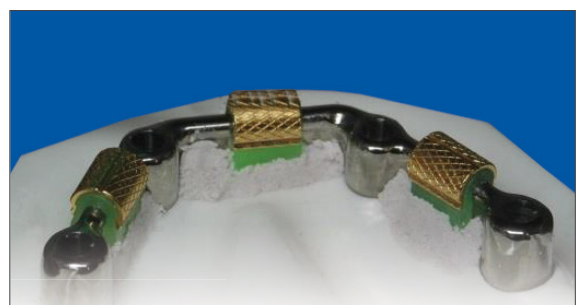

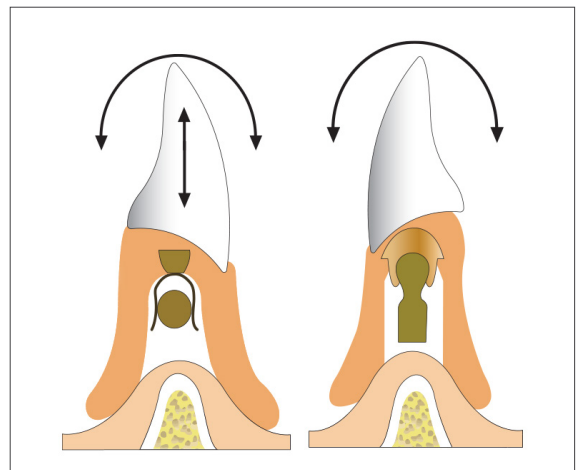

- » Metal Ackermann clips provide both vertical and rotational movement, ideal for 2 abutments bar with a single straight section and for protecting abutments.
- » Plastic Hader clips provide rotational movement. Ideal for restorations utilizing multiple bar sections and/or for rigid/fully abutment supported prostheses.

Space Saving

- » Total vertical height of bar, 2.5mm.
- » Total vertical of attachments, 1.5mm.
- » Total width of attachment, 4.2mm.

Easy to Service

- » 4 retentions of plastic clips to provide patient specific retention
Replacing a Hader clip can be done in less than 30 seconds
- » 2 designs and 2 alloys of metal Ackermann clips

ATTACHMENTS

OVERDENTURE BAR ATTACHMENTS

DIRECT RETAINERS

Hader Bar Attachment

4mm† x 3mm

4 Retention clips provide rotational movement on the bar

Experience PreatLoc™

The Next Generation in Overdenture Attachments

Backed by 45 years of Preat overdenture expertise and trusted support, **PreatLoc™** delivers reliable performance for your practice and lasting smiles for your patients.

The PreatLoc™ Advantage

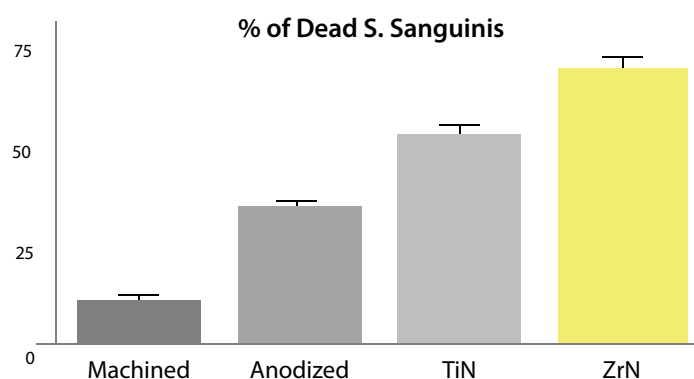

Compatible: PreatLoc™ is compatible with the leading overdenture attachment system and all major implant systems.

Tissue-Friendly: The tissue-friendly ZrN coating is designed for comfort and cleanliness, reducing biofilm, plaque adhesion and inflammation.

Reliable Retention: PreatLoc™ retention inserts have demonstrated reliable lifetime performance over 5,000 cycles and have strict tolerance parameters to ensure they deliver the stated retention force.¹

Treatment Flexibility: Our 18° angled abutments address up to 76° divergence, helping maintain balanced load distribution for less insert wear and greater patient comfort.

PreatLoc™ ZrN Tissue-Friendly Surface Promotes Long-Term Success

- Biocompatible surface with reduced plaque adhesion^{1,2}
- Shows greater bacterial resistance than TiN²

1. Chih-Ho Lai, Yin-Yu Chang, Heng-Li Huang, Ho-Yi Kao. Characterization and antibacterial performance of ZrCN/amorphous carbon coatings deposited on titanium implants. Available online 25 June 2011

2. Brunello G, Brun P, Gardin C, Ferroni L, Bressan E, Meneghello R, et al. (2018) Biocompatibility and antibacterial properties of zirconium nitride coating on titanium abutments: An in vitro study. PLoS ONE 13(6): e0199591. <https://doi.org/10.1371/journal.pone.0199591>

Solutions

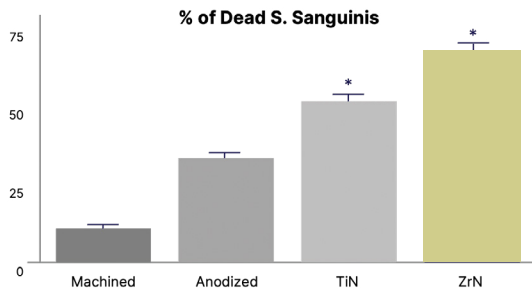

SYSTEM OVERVIEW

PreatLoc™ is a complete overdenture attachment system designed for reliable performance and seamless integration.

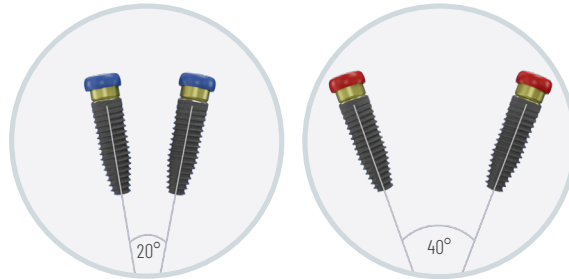

Tissue-Friendly ZrN Coating

- Biocompatible surface with reduced plaque adhesion^{1,2}
- Has shown greater bacterial resistance than TiN²

Reliable Retention

- Standard pivot inserts accommodate up to 20° divergence
- Extended pivot inserts for up to 40° divergence
- Demonstrated reliable and long-lasting performance³

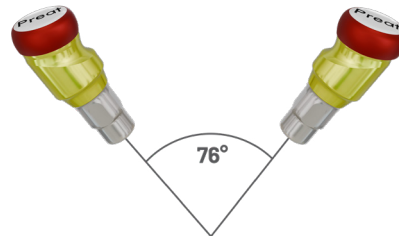

Anodized Aesthetic Denture Cap

- Enhances aesthetics in thin acrylic for an improved appearance without compromising prosthesis contours

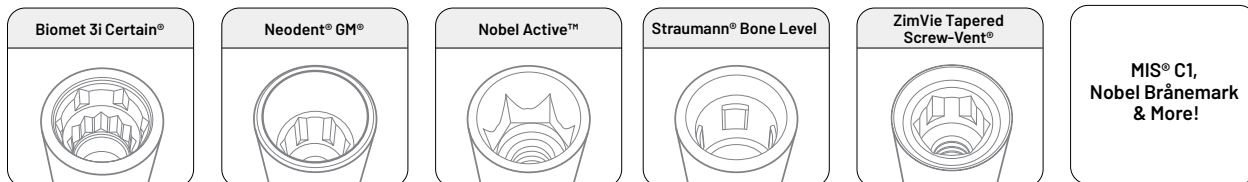

Treatment Flexibility

- 18° angled abutments improve abutment parallelism, load distribution and insert performance
- When used with extended pivot inserts, PreatLoc™ angled abutments accommodate up to 76° of implant divergence.

Highly Compatible. Zero Learning Curve

- Compatible with the leading overdenture attachment system
- Compatible with all major implant systems, including NobelActive™, Straumann® Bone Level, ZimVie Tapered Screw-Vent® and more.

PreatLoc™

DIGITAL OVERDENTURES

The Industry's Most Powerful Digital Workflow

Backed by 45 years of overdenture expertise, the PreatLoc™ Digital Workflow is available for both the abutment-level and implant-level, with the implant-level workflow being a first-of-its-kind innovation in digital overdenture design.

FASTER

No time-consuming workarounds for implant-level scans.

SIMPLER

No new scan body purchases. No rescans.
No chairside pickup. Just an intuitive CAD workflow.

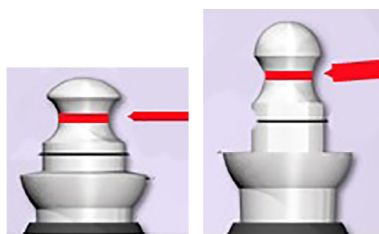

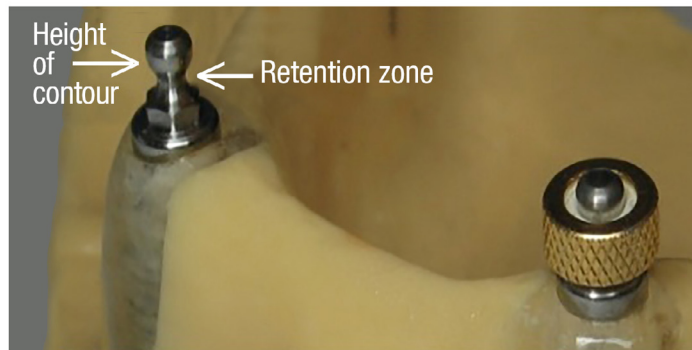

MORE PRECISE

Protect denture strength with digitally designed housing recesses engineered for accuracy and consistency.

PreatLoc™
Scan Smarter.
Design Better.
Deliver More.

To determine the correct size O-ring needed, measure the retention zone (red line) – or the area on the male post where the O-ring seats. Select the O-ring from the size chart with the closest matching internal diameter to assure proper fit. The O-ring Combo pack is a great option as well.

		Size	Internal Diameter (mm)	Outside Diameter (mm)	Corresponding Metal Retainer (aka ring)
	Black #2 (12-Pack 1500603)	Micro	1.00mm	3.6mm	Metal Retainer #2 (1500602), Closed Metal Housing #2 MH-2 (1500601)
	Black #2M (12-Pack 1500197)	1.8 Mini Implant	1.20mm	3.60mm	
	White #3 (12-Pack 1500504)	Standard	1.40mm	4.50mm	Metal Retainer #3 (1500502). For Mini Implants Only: Closed Metal Housing MH-1 (1500501)
	Black #3 (12-Pack 1500503)	Standard	1.40mm	4.50mm	
	Black #4 (6-Pack 1500194)	Large	2.00mm	5.20mm	Metal Retainer #4 (1500204)
	Black #5 (6-Pack 1500195)	Extra Large	2.40mm	6.25mm	Metal Retainer #5 (1500205)
	Combo Pack (10-Pack 1500200)	Micro (2) 1.8 Mini Implant (2) Standard (2) Large (2) Extra Large (2)	2 of each size (Black)		See above
	O-Ring Servicing Kit (1500202)	Micro (2) 1.8 Mini Implant (2) Standard (2) Large (2) Extra Large (2) Insertion Tool (1)	2 of each size (Black) Insertion Tool		See above

IMPLANT ABUTMENTS/ATTACHMENTS

OT Equator is the smallest dimensional overdenture attachment, in terms of size, available on the market today. The maximum vertical dimension (attachment, retentive cap and housing) is only 2.1mm with a diameter (attachment, retentive cap and housing) of 4.5mm.

The attachment system includes retentive caps in various colors corresponding to different levels of retention as well as the Smartbox titanium housing for retentive caps. The innovative Smartbox design allows a passive insertion of the cap even under extreme divergence conditions up to 50° thanks to a tilting mechanism with a pivoting fulcrum. The Smartbox is compatible with the OT Equator direct attachment.

Call for information on OT Equator attachments which are available with heights ranging from 0.5mm to 7.0mm for a variety of implant systems and may even be custom-made if needed.

TRI-LOR®

HIGH PERFORMANCE POLYMER

TriLor is a millable fiber-reinforced resin material designed for suprastructures for full arch restorations and bridge frameworks.

This super-strong resin flexes and bends under stress, transferring less energy to the implants, making it an ideal support material for implant restorations.

- Lightweight and Esthetic
- Full Covalent Bond
- Time and Cost Savings

**Fabricated at the bench in under
30 minutes with a handpiece!**

See What our Customers Say

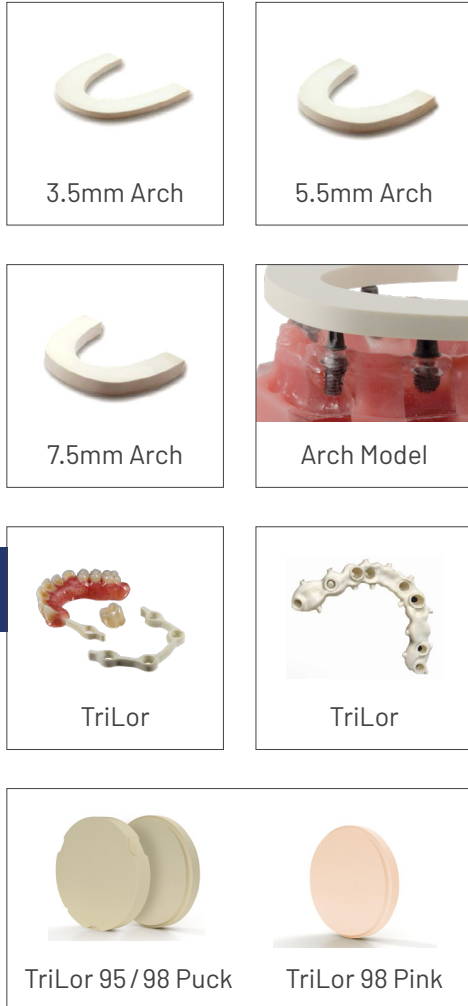

"Predictable outcome is predictable income. I use TriLor as a tool to make my implant retained cases predictable."

– Jeremy Wohlers, CDT
Owner of Esthetics in Function Dental Lab

"TriLor has improved workflow in my laboratory and chairside while still achieving a very esthetic outcome"

– Eugene Royzengurt
Owner of Apple Dental Lab

TriLor® is a millable fiber-reinforced resin material designed for suprastructures for full arch restorations and bridge frameworks. This super-strong resin flexes and bends under stress, transferring less energy to the implants, making it an ideal support material for implant restorations. The TriLor® Arch uniquely allows the Dental Professional to design the framework using a lathe or handpiece. CAD/CAM TriLor® Pucks also available.

Perma Ret: a simple solution for Permanent Retention of acrylic and composite denture teeth in both full and partial dentures. Simply drill a small hole in the tooth with the provided twist drill. Cut a length of wire and insert in the wire holder. Thread the wire into the tooth. Bend the wire into desired position. Then process the denture base material. Wire is now anodized for improved esthetics.

IMPLANT PROSTHETICS

Preat **CHOICE LIBRARY**

We've expanded the Preat Choice Library to give you even more implant system choices. With these additions, the Preat Choice Library is compatible with all major implant systems – **40 platforms in total**.

For each system platform, the scan body gives you access to 18 different restorative options, including engaging and non-engaging, for fixture-level restorations.

» **ANGLED SCREW CHANNEL (ASC) TITANIUM BASES**

designed for optimal esthetics and function with 0° to 30° channel angulation, cement groove to prevent overflow, plus retention grooves and blasted surface for enhanced cement adhesion

» **STRAIGHT TITANIUM BASES** for digital or traditional workflow

» **VERIFICATION CYLINDERS** for provisional restorations with variable height options

» **PLUS 9 DIFFERENT RESTORATIVE SOLUTIONS** for full arch cases

» **PATIENT-SPECIFIC ABUTMENTS** tailored to your patients' needs, offering up to 30° of angulation

Preat Angled Screw Channel Titanium Bases

EXPANDED CUSTOMIZATION. SIMPLIFIED INVENTORY.

Designed with a 9 mm height,
customizable to 7 mm or 5 mm
for optimal fit

Blasted surface and
retention grooves improve
cement adhesion

Gold hue anodization for
improved aesthetics

Variable screw channel
provides **0-30°** angulation for
easy adjustment to optimize
esthetics and accommodate
challenging cases

Cement groove helps
prevent cement overflow
when adhering crown

With 29 interfaces, Preat's ASC Ti Bases provide broad compatibility
with the leading implants on the market. Available in engaging and non-
engaging implant-level and multi-unit options.

YOUR KEY TO RESTORATIVE CHOICE

The Preat Choice Library was built on the concept of giving you restorative choice from a single **scan body**. Now it's even easier to access our eighteen different options for fixture-level cases and nine restorative solutions for multi-unit level cases with the new titanium scan body. Whether you are scanning intraorally or in the laboratory, the scan body fits within your workflow and **allows you to design the best possible restoration for the case.**

TITANIUM SCAN BODY

MATTE FINISH

Easy scanning with no reflection

TITANIUM

Radiopaque to verify fit intraorally

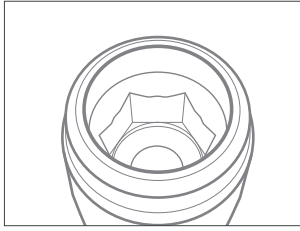

LASER ETCHED

Clearly identify the system and size plus easily match with the product description in the CAD software

DESIGN RESTORATIONS WITH

Multi-Unit Compatible

THE BIDRA CONVERSION SMART POLISHING CAP

With an extended metal rim, **the Bidra Conversion Smart Polishing Cap fully protects both the inside and outside of the metal coping**, preventing damage to the coping when setting the acrylic, and while trimming, polishing and finishing the prosthesis.

External rough areas attract bacteria and may lead to soft tissue inflammation and bone loss around the implants.

Existing polishing caps only protect the inside of the coping, not the outside.

THE CUFF HEIGHT AND ANGULATION SET*

The Must Have Tool for All Implant Professionals

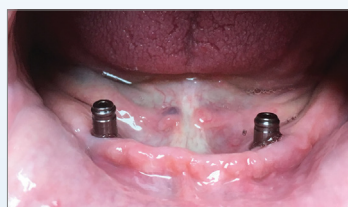

Stop Guessing Abutment Heights & Angulations

EASY TO USE

1. Place the tool on top of the implant platform to measure gingival height.
2. Rotate angle measurement arm to identify if a straight abutment, 17° or 30° abutment is necessary.

Item #8000085

Abutments Too High?

Abutments Too Low?

See What our Customers Have to Say

"This is a must have tool for anyone doing anything implant related. I use this tool daily!"

- Sevan Pulurian, Pacific Dental

"This tool really saves me time and confusion on large implant cases. It takes away all the guesswork and permits me to plant these cases accurately from the laboratory, allowing for the proper ordering of necessary components."

- Joshua Polansky, MDC, Niche Dental Studio

"When things get tough small tools can have a big impact. Using this one almost every day. Thank you PREAT, great development!"

- Alexander Wünsche, Cdt, Zahntechnik Inc.

*Set includes two diameters of the tool, allowing use on implants from 3mm to 6mm Ø.
